Fall Hunter Pace - September 27th

We are celebrating the close of another Fall Hunter Pace with special thanks to Mother Nature for a gorgeous day. The ultimate kudos, however, go to our very gracious and generous landowners who allowed us to cross the private trails over their beautiful properties. We had forests, fields, hills, meadows and water - a view few have the privilege to experience. We hope that you will all come back next year and consider joining us in the hunt field. Please feel free to contact me if you have any interest at all.

As a little background, a Hunter Pace is to be a trail course designed to simulate a typical hunt in distance, terrain and timing. A Pace should be marked to provide guidance (as a fox might lead a hound) but not pave the way. A traditional Pace would have you look for the markers and not make it very obvious. In past years, we have erred on the side of obvious. Apparently, this year we opted to be a bit more traditional. While a couple of teams became lost and retired, a good time was reported by all. So, in our eyes, a resounding success.

On behalf of the Metamora Hunt and the very special cast of volunteers who made the Pace possible, I want to extend a congratulations to all who participated.
